**CODIAK AMIGO HALF-SISTER** - Yearling heifer champion at Farm Fair International 2013.

- Amigo is a smooth made, eye-appealing sire that offers calving ease and a low birth wt. of 74 lbs. To complement this, he also offers growth and length and extension. He is sure to inject the great carcass genetics Speckle Park are known for into his calves.
- Why use a Speckle Park bull?
- Consistently grade AAA, consistently produce REA by industry standard, ideal fat cover, consistently high dress out percentages.
- These traits appear in Crossbreds.
- At the Calgary Stampede from 2010 to 2013, based on 62 carcasses, Speckle Park achieved the following:
  - 73% graded AAA. Canada's AAA is USDA Choice. In 2 years only 2 carcasses graded Prime; one was a Speckle Park.
  - Sq. cm. average REA from an average carcass weight of 715 lbs., 9 mm average fat cover.
  - Almost 50% (19/40) of the top ten carcasses each year for the four years were Speckle Park.
  - Backed up by multiple carcass and steer competitions winners in Australia including Royal Show carcass champions.
