## DIRECTIONS TO WARATAH

We at Waratah would like to personally welcome you to our 2015 Speckle Park sale. Cattle have been carefully bred, offering buyers good quality cattle straight from the herd. We are proud of the cattle offering this year and believe the line up offers buyers a dynamically diverse selection of genetics. It is our wish that you find what you're looking for here at Waratah.

It is an exciting time for us as we continue to grow and expand our Speckle Park stud despite dry times of late. While the weather has proven difficult we remain committed to producing quality cattle and continue to source top quality international Speckle Park genetics. This year we are pleased to introduce three new sires into our stud. Sourced for their outcross pedigree and outstanding qualities, we aim to improve our stud in order to provide our clients with a variety of breeding options.

Low birth weights continue to be top priority here at Waratah Speckle Park. We believe low birth weights are essential to maintain ease of calving within our herd. This year we have averaged 40.8kg birth weights.

Waratah Speckle Park cattle undoubtedly continue to shine in the show ring. We have had several successes this year, most recently at Rockhampton winning Grand Champion Speckle Park Female. While the breeds show success continues to excel across Australia, Speckle Park's feedlot performance is catching cattle producer's attention! Speckle Park cross cattle from Waratah performed extremely well at a feedlot last year, yielding 58.8%. The tail end cattle even put on 2.2kg/day. More importantly, we received very positive feed back from the processor, with all animals scoring high on the MSA grade. Congratulations to Minnamurra Pastoral Company for their success in the 2015 Beef Spectacular Feed Back Trial. They entered four teams of Speckle Park x Angus cattle with exceptional results. Out of the 94 teams they placed 3rd and 4th for feedlot performance, and 1st, 2nd, 3rd and 8th in the carcass section.

At Waratah we believe that your success is our success. It is encouraging to hear the overwhelming positive feedback from clients; their success in the paddock, at the show, at market and livestock auctions. Cattle producers, feedlot operators and processors are all taking a greater interest in Speckle Park beef.

Thank you to Downlands College, Toowoomba for your tremendous work preparing and presenting our cattle at shows around South East Queensland and at Beef Australia, Rockhampton this year. We are proud of your contribution, hard work and showmanship. The positive results in the show ring are a tribute to your cattle team. Job well done!

The success of Speckle Park cattle in Australia is attributed to the hard work and dedication of all Speckle Park cattle breeders. We at Waratah believe Speckle Park cattle have a bright future not only in Australia but internationally as well. We are committed to the Speckle Park breed and are expanding our business to meet the ever-growing demand for Speckle Park cattle.

We wish you all the success with your purchases and until next year....

With thanks,

Eric, Helen, Laiton & Kayla Turnham

## SHOW RING & CARCASS SUCCESS

Waratah Speckle Park cattle continue to shine in the show ring. The 2014 Royal Brisbane show was a huge success with our Speckle Park bred steer winning the Meat Standards Australia Eating Quality Award in the Woolworths Premier Carcass Competition. Speckle Park meat continues to grow in popularity and we are honoured to receive such a prestigious award for our cattle. A big thank you to Tenterfield High School for your excellent work fitting and presenting our Speckle Park cross steer.

We kicked off 2015 with the Glen Innes show, prime cattle classes, taking home Grand Champion cow and calf. Won by Waratah Spanish Angle F15 and her Speckle Park Gold G25 calf at foot, mother and baby were definitely crowd pleasers. From the moment we arrived to returning home, our Speckle Park animals generated much interest amongst other cattle breeders and onlookers. Waratah also won Grand Champion first calver with our homebred Speckle Park cross Brahman cow (Brahckle) and her first calf by Waratah Gold G25. The judge was impressed by her maternal ability, producing such a good first calf.

**Waratah Hume Parading at Beef Australia 2015**

Waratah Speckle Park cattle were exhibited at several shows across South East Queensland. Inglewood show was a success with Waratah H11 winning Grand Champion Speckle Park female and Waratah Amy J53 placed first in her class. The Toowoomba Royal Show saw Waratah H11 take home Senior Champion Speckle Park female, Waratah Amy J53 placed Junior Champion Speckle Park female and Waratah Ember J31 scoring Reserve Junior Champion Speckle Park

**Waratah H11 Grand Champion Female Beef Australia 2015**

female. Waratah Speckle Park females were unbeatable at the Pittsworth show, winning Grand Champion Speckle Park female with Waratah H11 and Reserve Senior Champion Speckle Park female with Waratah Amy J53. The highlight of the show was Waratah H11 being crowned Supreme British female! We'd like to acknowledge Downlands College, Toowoomba, for preparing and exhibiting our cattle. They did an exceptional job which is evident in our winning results.

Beef Australia held in Rockhampton this year saw another great line up of Speckle Park cattle. Waratah females were unbeatable, winning Champion ribbons in all classes entered. Grand Champion and Senior Champion Speckle Park female was won by Waratah H11 with calf at foot. Reserve Senior Speckle Park Champion female was won by Waratah Amy J53 and Junior Speckle Park Champion female was awarded to Waratah Ember J31. Waratah performed exceptionally well in the breeders group taking home second place prizes. Another huge thank you to Downlands College, Toowoomba, in particular Kate Strong and Cloe Wallace, for your hard work and contribution preparing and presenting our cattle at Beef Australia.

### Inspections

Cattle will be on display from 9.30 am on sale day. We welcome your inspection of the cattle prior to sale day by appointment only.

### Refreshments

Black Mountain Public Primary School P & C will be catering Speckle Park BBQ and light refreshments for the day, with all proceeds going to the school.

The Speckle Park beef provided on sale day was bred at Waratah.

### Travel Arrangements

The sale will be conducted at 'Waratah', Guyra, situated 38 km north of Armidale and 60km south of Glen Innes (see map on page 41).

By air, Armidale is accessible via Sydney only. The flight is approximately 1 hour. 'Waratah' is 40 minutes' drive from the Armidale (NSW) Airport. Car hire is available from the Airport.

By road Guyra is centrally located approximately 6 hours between Sydney and Brisbane on the New England High way.

### Accommodation

Motels are available in Guyra, Armidale and Glen Innes.

### Outside Agents Rebate

A rebate of 2% is available to outside agents introducing buyers one business day, (Friday, 10 July by 5pm) prior to the sale in writing to Colin Say & Co - Fax: (02) 6732 4073 or Email: [office@colinsay.com.au](mailto:office@colinsay.com.au) Outside agents must settle on the clients behalf within 7 days after the sale. Please note this will be strictly adhered to.

### Auctions Plus

If unable to attend the sale on the day, the sale can be followed online at [www.auctionplus.com.au](http://www.auctionplus.com.au) Auction Plus is an alternate bidding option. Please note that Auctions Plus is only available to registered users.

Register at [www.auctionplus.com.au](http://www.auctionplus.com.au) or by phone (02) 9262 4222. We recommend registering at least one business day (Friday, 10 July by 5pm) prior to the sale.

### Herd Health Status

Animals in the sale have met all necessary health requirements. Cattle are breed from Bovine Johne's protected status area and have been inspected by Embryo-Life veterinarian Dr. Udo H. Mahne. For individual breeding certificates contact Udo on 0467 882 801.

### Sale Day Safety

Your safety on sale day is important to us. Our cattle are quite and well-tempered however, animal behaviour can be unpredictable at times. Animals can react differently when exposed to large crowds of people and noise. If you wish to enter inspection yards please be mindful of the animals. Please do not enter sale pens with small children or if you have limited mobility.

### Supplementary sheet

Updated weights, scans and pregnancy diagnosis will be provided on sale day along with any other new or additional information.

### Raw Scan Data

Raw scan data will be available on the supplementary sheet on sale day.

### Transport

All cattle to be transported from 'Waratah' need to be picked up no later than 27 July 2015, except for overseas purchased cattle. Arrangement for overseas purchases need to be made with the vendor prior to sale day.

No pickups available on Saturdays.

Please ring Nathan Purvis re: transport coordination 0427 324 078

### Mobile Coverage

There is good mobile phone coverage at 'Waratah'. Please make arrangements with agents for phone bidding.

### Delivery of Embryos

They can be privately picked up or transported through Wyatt Artificial Breeders (02) 6629 3177 or 0418 628 157.

### Semen Rights

Waratah Speckle Park retain semen rights in a number of bulls each year. This will be outlined under the Lot number or on the supplementary sheet.

## Breeding Guarantees

---

### Bulls

All bulls are guaranteed breeders and have passed a semen test and structural assessment prior to the sale. For breeding certificates please contact Embryo-Life veterinarian Dr. Udo H. Mahne on 0467 882 801.

In the unlikely event of infertility, the vendor guarantees that (without expenses, interest, costs and damages) if the bull proves to be totally infertile or totally incapable of natural service, provided it is not caused by injury, disease, mismanagement or negligence since leaving the sale, to either replace with an animal of comparable value upon return of the affected bull or credit (purchase price, less the salvage value) will be given at the next sale or on a private sale animal.

Bulls that are run in a multiple joined environment are not guaranteed by Waratah for breakdown or injury. Yearling bulls (under 18 months) are not guaranteed if joined with more than 30 cows in their first year.

If the bull does not possess a reasonable fertility, although not totally infertile, any claim shall be considered on its merits by the vendor and his veterinarian. Any complaint must be lodged with a relevant veterinary certificate within 6 months of the sale direct to the vendor.

### Females

All females are sold as guaranteed breeders. In the unlikely event that a female cannot be successfully bred by natural service within 6 months of the sale date or by the time the female reaches 22 months, provided that the purchased female has not been injured, contracted disease, been mismanaged or neglected since leaving the sale, upon return of the affected female, the vendors' guarantees (without expenses, interest, costs and damages) the purchase be refunded or a replacement female will be

given. This guarantee does not apply to a female that is entered into an embryo transfer programme. Any complaint must be lodged to the vendor with a relevant veterinary certificate.

### Insurance

---

We encourage buyers to insure their purchased lot or lots at the time of sale. All care will be taken from the fall of the hammer but it is the purchaser's responsibility for any injury or death occurred thereafter. We recommend buyers to organise insurance for your purchases with their Agent or talk with Colin Say & Co to help arrange insurance for you on the day.

### Advice Disclaimer

---

At Waratah Speckle Park we are willing to provide assistance to those seeking guidance and our opinion on cattle. However, the final decision is that of the purchaser. Waratah Speckle Park will not be responsible for the final results and performance of purchases outside our warranty.

### Sale Catalogue Disclaimer

---

The vendors have taken care to provide information that is correct to the best of their knowledge at the time of publication. However, neither the vendors or the selling agents make no other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. It is advised that you seek independent verification of any information contained in this catalogue before relying on such information announcements made on sale day supersedes information in this catalogue.

**Speckle Park heifers, Gapview, Guyra NSW**

### CARING FOR WARATAH SPECKLE PARK BULLS: PROTECT YOUR INVESTMENT

#### The Waratah Way

The purchase of a Waratah bull is a long-term investment, so they should be treated with care and in a gentle manner. Always handle them quietly and at a walking pace. By doing so, you will earn their respect and maintain their good temperament. Our bulls are vaccinated and drenched prior to sale and can serve approximately forty cows as two year olds and slightly more as older bulls. They are handled with dogs and contained using electric fencing, so they will treat both with respect. A Waratah Bull provides excellent opportunities in genetics and can improve the value of your herd into the future.

#### Transportation & Handling

At the fall of the hammer at auction you take possession of your purchase, so from that moment, it is important to treat your new investment with care. You might like to consider insurance for transportation back to your property and for the first few months of ownership. A bull leaving Waratah should be unloaded at your yards, with house cows, steers or herd cows as companions. Always separate bulls from different origins into different yards. Remember your bull is leaving the security of a mob and will arrive in unfamiliar territory at your property.

#### Vaccinations/Treatment

Always consult with your veterinarian and establish a health treatment plan to be given on arrival at your property. It is important to vaccinate against vibriosis, as it is a common cause of infertility and is transmitted by infected bulls. Fortunately, this disease is easily prevented by vaccination prior to joining each year. A drench is important when he is finished serving the cows. You may also treat bulls yearly with other injections that are appropriate for your local area/state.

#### Behaviour & Temperament

The temperament of any bull is best demonstrated by their behaviour in the yard before auctioning begins. During and after action and/or on arrival at your property their behaviour may change due to changes in environment and increased stress. Bulls may display a change in temperament, becoming excited and/or agitated. A number of stimuli may cause this change including unusual and loud noises, new people, crowds, a new environment, new feed, loss of mates, a new herd and different handling methods. This can be very upsetting to animals. It is best to allow bulls' time to adjust to their new environment. You can assist this by providing adequate feed, water, low noise levels and a mate i.e. house cow. Once settled into their new environment bulls' temperament will return to normal.

#### Young Bulls (12-18 months)

It is possible for a young bull to settle in with older bulls, however the paddock needs to be large enough for the young one to keep away from the others and to find adequate feed. As the new bull, he will get the last of the feed available because of the pecking order. Young bulls are still growing and need enough feed to maintain their growth pattern, which may require supplement feed in the first breeding season. Having enough paddock area also helps them to be able to settle the cows quickly and efficiently. We recommend mating loads of only 25-30 females. Never overwork young bulls. As they are not fully developed they will be leaner and carry less body fat reserves. If their condition score declines to below 3, sperm production may be compromised. Their condition is essential for good fertility. It is also important to note that the joining season may need restricting to 6-8 weeks if conditions are poor and where good quality feed is unavailable.

#### Mating

Cows should be seen cycling in groups with male calves hanging around before mating. If using several young bulls, they should be run together for a few weeks prior to joining. This should reduce problems later on as they will have already established a hierarchy. Also, young bulls that have been recently purchased should not be joined together with older bulls.

Always observe your bull when he is working as accidents can happen. Bulls can scratch their penis on dry manure on the cows backside which can lead to infection with large sores forming. If treated quickly this can be remedied. If a bull is not serving he needs to be replaced, but remember, if the cow has been served before the observer has arrived, the bull may not repeat the performance. Remember any day he is not working can cost you money.

#### Nutrition

When your new bull arrives at your property, provide adequate hay and water and leave him alone until the next day so he has a chance to settle. Before you join your bull with a herd, the cows should be on a rising plane of nutrition to ensure they have the greatest possible chance of cycling. When the season is finished, the bull should be put away with quality, adequate feed, as this will help prevent fighting.

**Please remember: Always respect your bull and he will respect you.**

# UNDERSTANDING COLOUR PATTERNS

It is important to understand how Speckle Park colour patterns work in order to achieve your breeding goals. While some breeders are mostly interested in producing speckled cattle others want to inject Speckle Parks' notorious hybrid vigour while retaining predominantly black herds. For example, when a solid black Speckle Park bull is joined with 100% purebred Angus cows the resulting calves will be 100% solid black.

Speckle Park cattle have four distinct colour patterns; speckled, leopard, white pointed and solid black. The speckle and leopard colour pattern are genetically the same except for varying degrees of spotting. Some Speckle Park cattle can produce red colour patterns if both parents carry the recessive red gene.

This can be adapted for cross breeding. For example an Angus cow x White Speckle Park bull will result in speckled coloured calves.

**This sire has 1 female in the sale.**

## See the Difference. Drovers NLIS Tags.

Drovers tags are made from the highest quality polyurethane, with additives to enhance colour and inhibit UV fading or degradation.

- > **FASTER:** It takes 53% less energy to activate the TurboCHIP
- > **FURTHER:** It takes 33% less voltage to keep the TurboCHIP active
- > **BETTER:** The signal sent from the TurboCHIP to the reader is clearer and easier to understand
- > Sharper angle = stronger connection
- > Easier application with less effort
- > Keeps the chip protected from the elements
- > Less effort, less error and increased retention
- > Positive Lock (When its in, its in.)
- > UV stabilised

Purchaser: ..... \$ .....

### Marketing Options

There are currently several different marketing options for Speckle Park cross cattle. With Speckle Park cross cattle increasing hybrid vigour and carcass merits they are growing in popularity.

- There are a number of private buyers sourcing Speckle Park meat for butcher shops and high end restaurant chains.
- Waratah Speckle Park has successfully marketed Speckle Park cross cattle to the supermarket trade with outstanding results. 25% of the cattle were MSA graded with a boning group score of one and 90% of the group scored four or better (MSA grading is from one to ten, were one is best.)
- Waratah Speckle Park cross cattle have also been sold and feed at feedlots.
- Waratah Speckle Park are planning to run a commercial Speckle Park auctions plus sale in the future.

## 4 FROZEN EMBRYO PACKAGES

### LOT 55 4 FROZEN EMBRYOS: CODIAK AMIGO 65Y X WARATAH E23

LEGACY UNRIVALED 12U

**SIRE: CODIAK AMIGO 65Y**  
CODIAK GNK 24T

**SIRE:** Codiak Amigo 65Y is an eye appealing sire that offers length and growth, his quiet nature is an added bonus. His half sister is a show champion in Canada and his half brother sold for \$17 500 Canadian in the 2014 Summit 3 sale. Amigo is sired by Legacy Unrivalled. His outcross pedigree makes him ideal to be breed to any Speckle Park female in Australia.

**Notes:** We have been so pleased with our first embryo calves by Amigo. They are small calves (all under 35kg) that grew like crazy once they hit the ground. The calves by this combination are all Speckled and stand out from the rest. Here is your chance to get some great outcross genetics. A guarantee of 50% pregnancy when implanted by our ET vet Udo Mahne. Australian buyers only.

Purchaser: ..... \$.....

PRAIRIE HILL JOHN WAYNE 50S

**DAM: WARATAH E23**  
NOTTA PHO-FINISH 54P

**DAM:** Waratah E23 is a big framed cow who is a power house of thickness and is extremely fertile. E23 has been used in our donor program and has consistently given high numbers when flushed. The highest Waratah E23 gave was 30 embryos in one flush. Her picture says it all.

### LOT 56 6 FROZEN EMBRYOS: CODIAK AMIGO 65Y X WARATAH H23

LEGACY UNRIVALED 12U

**SIRE: CODIAK AMIGO 65Y**  
CODIAK GNK 24T

**SIRE:** Codiak Amigo 65Y is an eye appealing sire that offers length and growth, his quiet nature is an added bonus. His half sister is a show champion in Canada and his half brother sold for \$17 500 Canadian in the 2014 Summit 3 sale. Amigo is sired by Legacy Unrivalled. His outcross pedigree makes him ideal to be breed to any Speckle Park female in Australia.

**Notes:** The resulting calves from these embryos will be white, as both parents are white. A guarantee of 50% pregnancy when implanted buy our ET vet Udo Mahne. Australian Buyers only.

Purchaser: ..... \$.....

STAR BANK LACERTA 68L

**DAM: WARATAH H23**  
WARATAH SPANISH ANGEL F12

# No Bull

*what others have to say*

**Ian & Ann's first bull, Waratah Front Runner, at 18 mths**

We have been using Speckle Park bulls for 4 seasons now over a Charolais cross Drought Master base herd of 300 cows. All of our bulls are from Waratah.

Running a small feedlot we produce calves for the supermarket trade. Speckle Parks have increased our carcass yield and feed conversion in our 3 way cross.

**Scott Beaumont, Dorrigo  
NSW 2014 Farmer of the Year Runner-Up**

We are very pleased with the Speckle Park bull we bought from Waratah, our first group of calves are outstanding. Our SP cross steers reach up to 406kg at 8 months of age with supplementary grain assistance.

we took some to the local Warwick show. A heifer calf out of a Gelbvieh cow by Waratah Front Runner won Grand Champion Prime Vealer, and Joel Rickert received Grand Champion Lead steer at the Warwick show with one of our SP cross steers.

**Ian & Ann Coy, Warwick, QLD**

**Scott's first Waratah Speckle Park Bull, Elvis E20**

**Waratah Eden and progeny, Dwight & Noela's Farm, Goolmangar**

We are really pleased with the progeny of our Speckle Park bull, Eden. A white Eden calf topped the Casino sale when we sold it and we've sold the as private kills or direct to butchers.

**Dwight & Noela Wyatt, Goolmangar NSW**

# No Bull

*what others have to say*

I purchased two heifers from Waratah's sale last year. Waratah J149 was shown at several local shows where she won numerous ribbons including a couple of champion ribbons. She was led by my younger sister, so she is definitely a quite animal.

**Charlie Sutherland**  
Deeargree Speckle Park - Uralla, NSW

We purchased our first Waratah Speckle Park bull in 2012. We had been interested in crossing our stud limousins with a speckle park after working in the led steer section and the Brisbane Ekka the year a speckle park/limousin cross steer was champion steer. He sold for in excess of \$20,000. Over the years we have produced a few limousin cross show calves and decided to try the speckle park cross. Our first crop of cross bred calves were very rewarding with several sold on to show homes and the balance being keenly sought after as butchers calves.

Last year we decided to expand into the speckle cross on a larger scale and purchased 3 more Waratah speckle park bulls at their inaugural on property sale. These bulls were joined to stud limousins, angus and black baldy cows. We are looking forward to the birth of approximately 130 of these cross bred calves this year. We are certain that there will again be led steer and show calf prospects amongst them.

Our experience with the Waratah bulls has shown them to be very tractable with a quiet attitude that they seem to pass on to their progeny. We will be attending the sale again this year.

**Denis Peters & Liz McDonnell, Paradise Creek Pastoral Co - Ebor, NSW**

**Waratah bulls (L) and 15 month old heifers (R), Doug & Rodda's Farm, 2015**

We were so pleased with the bulls we purchased from Waratah Speckle Park a few years ago - they got 64 calves in the first three weeks as yearlings. The cattle have incredible performance and are so quiet, even our agent was every impressed with there docility. Thanks so much.

**Doug and Raelene Rodda**

# No Bull

*what others have to say*

“Last year we fed about 100 of the Turnham’s Speckle Parks from Guyra. What a pleasure it was!

These Speckle Park cattle performed in every way. They adapted well to a grain fed diet. No sickness and the best of all, the lower end of them had weight gains of 2.2kg/day. The cattle were extremely quite too.

Another pleasing point was the extremely high yields they achieved approximately 60%. In all, just great cattle to feed.”

- Trevor Jellicoe, Fernville Corporation, Inverell NSW -

Speckle Park steers fed by Trevor Jellicoe - Fernville Corporation Pty Ltd.  
The steers dressed weight was 58.8% of their live weight.
