5TH ANNUAL SALE

TOP OF THE RANGE WARATAH BULLS & HEIFERS

MONDAY
9 July 2018

GUYRA NSW
12 PM

Opportunity. Discover. Embrace

We are passionate about our cattle breeding program and are excited to share our passion with you. We are thrilled to be able to offer you an exceptional draft of bulls and heifers.

WELCOME

to our 5th Annual Sale.

We are delighted to share with you this year's sale offering and hope you will find animals that will compliment your cattle operations.

'variety in one location...'

The 2018 season started off reasonably well here in Guyra however with little rain fall in Autumn we are now experiencing a dry winter with limited feed available. While the conditions are bleak here at Waratah, we know that there are many other farmers across Australia who have been experiencing more severe drought conditions than us.

While the weather has proven difficult, this year has been jammed packed with events to date.

PLEASE BRING THIS CATALOGUE TO THE SALE

WELCOME

Laiton returned to Canada in April to see the progression of Speckle Park cattle and source new Speckle Park genetics. While he was there, he visited 12 Speckle Park farms and attended two Speckle Park sales. We were excited to be able to purchase a new Canadian bull while in Canada to introduce here at Waratah. He is currently being collected for Australian export and we hope to use him this spring in our AI programs.

In May, Waratah journeyed north for the triennial Beef Australia event held in Rockhampton. With over 100 000 visitors Beef Australia offered a tremendous platform that enabled us to promote the Speckle Park breed to cattle producers from all over Australia as well as international delegates. The interest shown exceeded our expectations and we were honoured to share our passion for Speckle Park cattle with interested parties. There was a staggering 5000 cattle across all breeds exhibited at Beef, with 1662 stud animals on display. Speckle Park cattle were extremely well represented and provided remarkable competition out in the ring. Waratah Spanish Angel M124 won Junior Champion Female and Waratah Pho-Finish M125 won Reserve Senior Champion Female.

At the end of May, we also had our very first dedicated female sale. We offered clients the opportunity to purchase full embryo sisters to many of the cows we have retained here on farm as breeders along with some of our most successful donor cows. The sale was a success with the top priced female selling for \$16 000.

In June, Waratah then attend our 6th Farmfest in Toowoomba. There was significant interest on days two and three especially in buying commercial Speckle Park cattle. We have noticed Queensland's interest in Speckle Park cattle has increased significantly over the past several years. We look forward to seeing Speckle Park cattle continue to grow in numbers throughout Queensland.

Our upcoming sale will be our first offering of bulls by Trade Secret and Waratah Jump N Join. Trade Secret offspring have already had proven success. Our top female in the show ring this year at Beef Australia and the topped priced female in our May sire were both sired by Trade Secret. We are also offering females sired by new sires CN Zpotz Zazu, Minnamurra Lancelot and Yogi Goes Redneck as well as proven sire Spots N' Sprouts Stands Alone. There are over 20 different sire lines in the sale, offering buyers variety in one location.

We look forward to your company sale day either on farm or online at www.elitelivestockauctions.com.au

Kind Regards,
Eric, Helen, Laiton & Kayla Turnham

Video Sale

This sale will be conducted using video only. No animals will go through a sale ring. Please ensure you arrive early sale morning to view the animals in their display pens. Videos will be available online a week before sale day at www.elitelivestockauctions.com.au or via our facebook page.

Inspections

Cattle will be on display from 9.30am on sale day. We welcome your inspection of the cattle prior to sale day by appointment only.

Refreshments

Lunch and refreshments will be provided on the day by the Black Mountain Public School P & C, with all proceeds going to the school.

Travel Arrangements

The sale will be conducted at 'Waratah', Guyra, situated 38km north of Armidale and 60km south of Glen Innes.

By air, Armidale is accessible via Sydney and Brisbane. The flight is approximately 1 hour. 'Waratah' is 40 minutes drive from the Armidale (NSW) Airport. Car hire is available from the Airport.

By road, Guyra is centrally located approximately 6 hours between Sydney and Brisbane on the New England High way.

Accommodation

Motels are available in Guyra, Armidale and Glen Innes.

Outside Agents Rebate

A rebate of 1% is available to outside agents introducing buyers one business day (Friday, 6 July by 5pm), prior to the sale in writing to Ray White Rural Guyra – fax: (02) 6779 2034 or email: rural.armidale.nsw@raywhite.com and settle on the client's behalf within 7 days after the sale. A 2% rebate is available to outside agents who supply a letter of introduction as above and attend the sale with clients. Agents are required to settle on the client's behalf within 7 days after the sale.

Elite Livestock Auctions

If unable to attend the sale on the day, clients are able to live bid online at www.elitelivestockauctions.com.au. Please refer to the 'How to Register with Elite Livestock Auctions' page in this sale catalogue. It is highly

recommended to register with Elite Livestock prior to sale day if using this facility. Please direct any questions or concerns to Elite Livestock Auctions by calling 1300 15 31 35.

Herd Health Status

Animals in the sale have met all necessary health requirements. Cattle are bred on a Bovine Johne's, J-BAS 7 property and have been inspected by Guyra District veterinarian Dr. Leisa Brown. For individual breeding certificates please contact Leisa on (02) 6779 1173. Waratah Speckle Park is LPA and MSA accredited.

DNA Typed

All stud females have had hair samples sent away to be DNA typed, however some female results are still pending due to a backlog at the Neogen testing facility. Bulls will need to be DNA typed and parent verified by the buyer before they can be used on pure breed cows.

Sale Day Safety

Your safety on sale day is important to us. Our cattle are quite and well-tempered however animal behaviour can be unpredictable at times. Animals can react differently when exposed to large crowds of people and noise. If you wish to enter inspection yards please be mindful of the animals. Please do not enter sale pens with small children or if you have limited mobility.

Supplementary sheet

Updated weights, scans and pregnancy diagnosis will be provided on sale day along with any other new or additional information.

Raw Scan Data

Raw scan data will be available on the supplementary sheet on sale day.

Transport

All cattle that are to be transported from 'Waratah' need to be picked up no later than 20 July 2018, except for overseas buyers. Arrangements for overseas buyers need to be made with the vendor prior to sale day. No pickups available on Saturdays.

Peter Kratz Cattle Transport will be in attendance on sale day. Peter can be contacted on 0412 667 320 or transport arrangements can be made with selling agent Blake O'Reilly on 0448 213 668.

Mobile Coverage

There is good mobile phone coverage at 'Waratah'. Please make arrangements with agents for phone bidding.

Semen Rights

Waratah Speckle Park retain semen rights in a number of bulls each year. This will be outlined under the Lot number or on the supplementary sheet.

Breeding Guarantees

Bulls

All bulls are guaranteed breeders and have passed a semen test and structural assessment prior to the sale. For breeding certificates please contact Guyra District vet Dr. Leisa Brown on (02) 6779 1173.

In the unlikely event of infertility, the vendor guarantees that (without expenses, interest, costs and damages) if the bull proves to be totally infertile or totally incapable of natural service, provided it is not caused by injury, disease, mismanagement or negligence since leaving the sale, to either replace with an animal of comparable value upon return of the affected bull or credit (purchase price, less the salvage value) will be given at the next sale or on a private sale animal.

Bulls that are run in a multiple joined environment are not guaranteed by Waratah for breakdown or injury. Yearling bulls (under 18 months) are not guaranteed if joined with more than 30 cows in their first year.

If the bull does not possess a reasonable fertility, although not totally infertile, any claim shall be considered on its merits by the vendor and his veterinarian. Any complaint must be lodged with a relevant veterinary certificate within 6 months of the sale direct to the vendor.

Females

All females are sold as guaranteed breeders. In the unlikely event that a female cannot be successfully bred by natural service within 6 months of the sale date or by the time the female reaches 22 months, provided that the purchased female has not been injured, contracted disease, been mismanaged or neglected since leaving the sale, upon return of the affected female, the vendors' guarantees (without expenses, interest, costs and damages) the purchase be refunded or a replacement female will be given. This guarantee does not apply to a female that is entered into an embryo transfer program. Any complaint must be lodged to the vendor with a relevant veterinary certificate.

Insurance

We encourage buyers to insure purchased lot or lots at the time of sale. All care will be taken from the fall of the hammer but it is the purchaser's responsibility for any injury or death occurred thereafter. We recommend buyers to organise injury insurance with their Agent or David Difranti 0412 328 911, from WFI Insurance will be available on the day.

Advice Disclaimer

At Waratah Speckle Park we are willing to provide assistance to those seeking guidance and our opinion on cattle. However, the final decision is that of the purchaser. Waratah Speckle Park will not be responsible for the final results and performance of purchases outside our warranty.

The Waratah Way

The purchase of a Waratah bull is a long-term investment, so they should be treated with care and in a gentle manner. Always handle them quietly and at a walking pace. By doing so, you will earn their respect and maintain their good temperament. Our bulls are vaccinated and drenched prior to sale and can serve approximately forty cows as two year olds and slightly more as older bulls. They are handled with dogs and contained using electric fencing, so they will treat both with respect. A Waratah Bull provides excellent opportunities in genetics and can improve the value of your herd into the future.

Transportation & Handling

At the fall of the hammer at auction you take possession of your purchase, so from that moment, it is important to treat your new investment with care. You might like to consider insurance for transportation back to your property and for the first few months of ownership.

A bull leaving Waratah should be unloaded at your yards, with house cows, steers or herd cows as companions. Always separate bulls from different origins into different yards. Remember your bull is leaving the security of a mob and will arrive in unfamiliar territory at your property.

Vaccinations/Treatment

Always consult with your veterinarian and establish a health treatment plan to be given on arrival at your property. It is important to vaccinate against vibriosis, as it is a common cause of infertility and is transmitted by infected bulls. Fortunately, this disease is easily prevented by vaccination prior to joining each year. A drench is important when he is finished serving the cows. You may also treat bulls yearly with other injections that are appropriate for your local area/state.

Behaviour & Temperament

The temperament of any bull is best demonstrated by their behaviour in the yard before auctioning begins. During and after action and/or on arrival at your property their behaviour may change due to changes in environment and increased stress. Bulls may display a change in temperament, becoming excited and/or agitated. A number of stimuli may cause this change including unusual and loud noises, new people, crowds, a new environment, new feed, loss of mates, a new herd and different handling methods. This can be very upsetting to animals. It is best to allow bulls' time to adjust to their new environment. You can assist this by providing adequate feed, water, low noise levels and a mate i.e.

house cow. Once settled into their new environment bulls' temperament will return to normal.

Young Bulls (12-18 months)

It is possible for a young bull to settle in with older bulls, however the paddock needs to be large enough for the young one to keep away from the others and to find adequate feed. As the new bull, he will get the last of the feed available because of the pecking order. Young bulls are still growing and need enough feed to maintain their growth pattern, which may require supplement feed in the first breeding season. Having enough paddock area also helps them to be able to settle the cows quickly and efficiently. We recommend mating loads of only 25-30 females. Never overwork young bulls. As they are not fully developed they will be leaner and carry less body fat reserves. If their condition score declines to below 3, sperm production may be compromised. Their condition is essential for good fertility. It is also important to note that the joining season may need restricting to 6-8 weeks if conditions are extensive and where good quality feed is unavailable.

Mating

Cows should be seen cycling in groups with male calves hanging around before mating. If using several young bulls, they should be run together for a few weeks prior to joining. This should reduce problems later on as they will have already established a hierarchy. Also, young bulls that have been recently purchased should not be joined together with older bulls.

Always observe your bull when he is working as accidents can happen. Bulls can scratch their penis on dry manure on the cows backside which can lead to infection with large sores forming. If treated quickly this can be remedied. If a bull is not serving he needs to be replaced, but remember, if the cow has been served before the observer has arrived, the bull may not repeat the performance. Remember any day he is not working can cost you money.

Nutrition

When your new bull arrives at your property, provide adequate hay and water and leave him alone until the next day so he has a chance to settle. Before you join your bull with a herd, the cows should be on a rising plane of nutrition to ensure they have the greatest possible chance of cycling. When the season is finished, the bull should be put away with quality, adequate feed, as this will help prevent fighting.

Please remember: Always respect your bull and he will respect you.

It is important to understand how Speckle Park colour patterns work in order to achieve your breeding goals. While some breeders are mostly interested in producing speckled cattle others want to inject Speckle Parks' notorious hybrid vigour while retaining predominantly black herds. For example, when a solid black Speckle Park bull is joined with 100% purebred Angus cows the resulting calves will be predominately solid black. Another example is when Angus cows are joined to a white Speckle Park bull the resulting calves will be predominately speckled.

Speckle Park cattle have four distinct colour patterns; speckled, leopard, white pointed and solid black. The speckle and leopard colour pattern are genetically the same except for varying degrees of spotting. Some Speckle Park cattle can produce red colour patterns if both parents carry the recessive red gene.

Please remember when dealing with nature individual results will vary. This is to be used as a guide only.
