

Waratah 2020 Sale Supplementary sheet

Older Cows Mouthed

All cows 8 years and older in the sale were mouthed at time of pregnancy scanning and are sound at time of sale.

Semen Marketing Rights

World Wide Sires would be interested to talk to the new owners of Lot 134 Waratah Perfect P239, to negotiate a potential semen marketing arrangement.

PTIC and Health Check Certificates

PTIC and Health Check Certificates are attached in the following pages, semen morphology testing certificates available upon request and will be sent with purchase invoice.

Catalogue Changes

Misprint	Change/Add
Lot 17 wrong colour printed	Colour is White
Lot 18 wrong colour printed	Colour is Black
Lot 209 wrong number on name	Waratah Amy P72 (not P27)
	LOT 155 P292 - DOB 2.8.2018
	LOT 156 P287 - DOB 5.8.2018
	LOT 157 P294 - DOB 4.8.2018

Clarification of Flush Rights

As you will see through the catalogue there are some female lots we have the desire to collect embryos from in the future. We wish to make things clear that this is a 'maybe' in the future and ONLY when suitable and when workable with the new owner and that ALL costs will be met by Waratah.

So to be very clear - in the future if any of the sale females which we have marked as a possible flush animal are purchased by you, Waratah will not be flushing any of these cows for two years or any Q females for three years from the sale date 31/08/2020, this would mean the soonest any flush would take place for cows would be the 1st of September 2022, or Q females the 1st of September 2023. This is so the new owner has exclusive use of their animals for the first two years for cows and for three years for Q females to enable them to flush and or calve their females first.

A flush if it takes place is for a minimum of 4 viable embryos (A or B grade) with no maximum limit. If less than 4 viable embryos are obtained a second flush may be required. If 4 or more viable embryos are achieved in the first flush. A second flush will not be required.

The Waratah 'Genetic Vault' Sale is indeed a complete sale of all saleable females, due to our family's succession planning, we are NOT holding anything back, this is it! We realise this concept may be new but we did not want to hold anything back from this unique sale and stress that we have ONLY designated an 'OPTION' to flush, it does NOT mean that all the said lots will be collected.

Should you have any further questions please don't hesitate to contact Waratah to discuss further.

Pregnancies between 5 and 7 months can be difficult to accurately age. This result is only as good as the identification of the cattle and the accuracy of the recording.

This is to certify that the above ear tag list of cattle that I DALE EDWARDS pregnancy tested by ultrasound examination, with results as shown above.
