This is to certify that on the 19-08-2020, Leisa Brown pregnancy tested sale females by ultrasound examination and rectal examination with the following results

P16 AI	P81 AI	P115 AI	P93 AI	P265 AI
P252 AI	P199 AI	P189 AI	P124 AI	P116 AI
P72 AI	P241 AI	P264 AI	P254 9wks	P117 9wks
P87 9wks	P198 8wks	P258 8wks	P86 5wks	

J185 4mths+	K56 3mths+	E23 85days	J167 85days
N119 10wks	J141 NDP	E27 NDP	

THE RESULTS OF THIS CERTIFICATE APPLY TO THE DATE OF THE EXAMINATION and no responsibility can be taken for any subsequent events that may contribute to the loss of the foetus, nor can this guarantee that any animal will given birth to a live full term calf. Rectal palpation is a highly accurate means of detecting pregnancy in cattle. There may be some cattle in the NOT DETECTABLY PREGNANT group that will be less than 6 weeks pregnant, a stage when pregnancy is difficult to detect manually.

Signed: Leisa Brown Date: 24-08-2020
