FEATURING LOTS

41 Speckle Park Bulls

12 Semen Lots

Hello and welcome to returning clients and those visiting for the first time. Here at Waratah we are busy making preparations for our 8th Annual on property Speckle Park sale. Waratah is the longest consecutive single vendor Speckle Park sale in Australia servicing clients across QLD, NSW, VIC, SA, TAS as well as internationally. With over a decade of breeding going into this year's sale bulls, we are very pleased to be offering a fine line up in 2021.

The bulls in this year's sale were born under one of the toughest drought seasons in 2019. Yet, despite the hurdles they have faced, our 2021 sale bulls have proven themselves growing into thick, well muscled Speckle Park sires.

The cattle market throughout 2021 has been incredible strong. It has been wonderful to see Speckle Park cattle sell for premium prices on Auctions Plus, in the yards and privately. With cattle prices at a record high, now is a good time to invest in a Waratah Speckle Park Bull.

Here at Waratah we test our seedstock genetics on our own commercial cows. Over the last several years Trade Secret and Codiak Amigo sons have time and time again proven themselves as calving ease sires for heifers. We have also been pleased with the size and weight of Wolf Lake Bob calves and recommend inspection of his sons as possible bulls suitable for heifer joinings. There are 15+ bulls suitable for heifers in the sale.

New genetics making a debut in our 2021 sale include sons by Up to Specs Ulysses and Wolf Lake Bob. Returning sires Ponderosa Chuck, Codiak Spencer and Petemar Special Edition as well as Waratah sires are well worth inspection. Those looking for fully imported Canadian genetics, there are 12 lots available.

Waratah Speckle Park 2021 females will be available for sale via private treaty from September. With a limited number of bulls for 2022, next year's sale bulls will be sold via private treating out of the paddock.

We look forward to seeing you either in person or online on sale day. Be sure to bring a warm coat in case the weather is a tad chilly.

Warmest Regards,
Eric, Helen, Laiton & Kayla Turnham

Want to stay at home?

BID ONLINE WITH ELITE LIVESTOCK AUCTIONS

Desktop, iPad and mobile bidding

Waratah is excited to partner with Elite Livestock Auctions to enable clients to live bid at home in real-time. Elite Livestock Auctions is Australia's newest innovative auction company who utilise the latest in live internet bidding technology to allow you to bid online from the comfort of your home or paddock. Buyers can view the auction and bid using a computer, iPad, iPhone or Android device. To register and bid follow the step by step guide provided. Once you have registered, be sure to "REQUEST TO BID" on our auction sale. You can enter our auction by simply clicking 'Enter Auction' for registered buyers or 'Watch Only' should you only wish to view our sale. International buyers can register with Elite Livestock Auctions. Please call or email to register before sale day.

**BID ONLINE FROM THE
COMFORT OF YOUR HOME
OR Paddock**

www.elitelivestockauctions.com.au

HOW TO REGISTER with ELITE LIVESTOCK AUCTIONS

Welcome to the new age of selling livestock in Australia and "Happy Bidding"

- 1  Simply go to www.elitelivestockauctions.com.au using your desktop, laptop, iPad, iPhone or android device
- 2  Click on the "Sign Up" page / link
- 3  Create a bidding profile using the bidder registration page.
(You can either register as a livestock agent, company or private buyer.)
- 4  Agree to the Elite livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue
- 5  Click "Register"
- 6  You will then be notified by email that an account has been created

- 7  Once an account has been created you are all "Set to Bid"
- 8  Each auction can then be viewed by clicking "Live Auction" logo on the Elite Livestock Auctions website
- 9  Once you receive email notification that your account has been created please go to the sale you wish to bid at and click "Request to Bid"
- 10  The sale agents will then approve your application to bid and on the sale catalogue you will see "✓ Bid Request Approved"
- 11  On Sale day simply login, click "Enter Auction" on the catalogue page and you can start bidding.
(There is no need for software download)
- 12  At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

Video Sale

Our sale will be conducted using video only. No animals will go through the sale ring.

Videos will be available online at www.waratahspecklepark.com and www.elitelivestockauctions.com.au or via the Waratah Facebook Page prior to sale day.

Inspections

Cattle will be on display from 9.00am on sale day. We welcome your inspection of the cattle prior to sale day by appointment only.

Refreshments

Lunch and refreshments will be provided on the day by the Bald Blair Public School P & C. COVID-19 guidelines will be followed. Barista coffee will also be available from 9:00am.

Help us stay COVID safe

#StopTheSpread

We will be adhering to the latest COVID information put out by the government on sale day. Our sale will be held outdoors to allow space to social distance. Please bring a warm coat in case the weather is cold. We ask that you maintain a safe distance of 1.5m away from other people and practice good hand hygiene by washing/gelling your hands frequently. We will provide hand gel stations around the sale facility to assist you with this. We also ask that you avoid handshakes on the day. You will be required to sign in on the day, as per normal Covid safe practices.

If you are unwell, have a cough, fever, shortness of breath or fatigue PLEASE STAY AT HOME. Clients are able to live bid at home in real-time through Elite Livestock Auctions.

Travel Arrangements

The sale will be conducted on property at 'Waratah' Guyra NSW. Guyra is situated 38km north of Armidale and 60km south of Glen Innes.

By air, Armidale is accessible via Sydney and Brisbane. The flight is approximately 1 hour. 'Waratah' is a 40 minute drive from the Armidale (NSW) Airport. Car hire is available at the Airport.

By road, Guyra is centrally located approximately 6 hours between Sydney and Brisbane on the New England Highway.

Accommodation

Motels are available in Guyra, Armidale and Glen Innes.

Outside Agents Rebate

A rebate of 1% is available to outside agents introducing buyers one business day (Friday, 27th of August by 5pm), prior to

the sale in writing to Ray White Livestock Guyra – fax: (02) 6779 2034 or email: livestockarmidale.nsw@raywhite.com and settle on the client's behalf within 7 days after the sale.

A 2% rebate is available to outside agents who supply a letter of introduction as above and attend the sale with clients. Agents are required to settle on the client's behalf within 7 days after the sale.

Payment

Ray White Livestock Guyra/Armidale will issue your sales invoice with 7-day payment terms. Eftpos facilities will be available on sale day, a 1.6% surcharge will apply.

Elite Livestock Auctions

If you are unable to attend our sale on the day or would prefer to bid from home, clients are able to live bid online at www.elitelivestockauctions.com.au.

Please refer to the 'How to Register with Elite Livestock Auctions' page in this sale catalogue.

It is highly recommended to register with Elite Livestock Auctions prior to sale day if using this facility. Please direct any questions or concerns to Elite Livestock Auctions by calling 1300 153 135.

Transport

All cattle are to be transported from 'Waratah' as soon as possible, except for overseas buyers. Arrangements for overseas buyers need to be made with the vendor prior to sale day. No pickups available on Saturdays.

Livestock carriers will be in attendance on sale day.

Peter Kratz (Armidale) - 0412 667 320

Alternatively transport arrangements can be made with selling agent Blake O'Reilly on 0448 213 668.

Mobile Coverage

There is good mobile phone coverage at 'Waratah'. Please make arrangements with agents for phone bidding.

Semen Rights

Waratah Speckle Park retain semen rights in some of their sale bulls each year. These bulls will be identified by this logo. Waratah reserves the rights to collect 200 straws of semen from each bull identified.

Herd Health Status

Animals in the sale have met all necessary health requirements. Cattle are bred on a BJD, J-BAS 7 property and have been inspected by Embryo-Life Veterinarian Dr Udo Mahne (BVSc).

Individual breeding/health certificates will be provided for all animals. These may be required by your preferred insurer.

Waratah Speckle Park is LPA and MSA accredited.

Health Treatments

Please refer to table below. All animals in this year's sale have been ear notch tested for Pesti virus and are negative.

Treatment	Date
Cydectin	02.5.2021
7 in 1	02.5.2021
Beachport liquid minerals	02.5.2021
Vibro	02.5.2021
Bovillis MH	03.5.2021

Bull Descriptions

Type of Bull	Description
Stud bulls (Thirty-two bulls in this sale)	These are selectively bred, DNA verified Speckle Park bulls that are registered with SPI.
Herd bulls (Seven bulls in this sale)	These are full blood unregistered Speckle Park bulls. (Progeny from these bulls cannot be registered with SPI)
Composite Bulls (Two bulls in this sale)	These bulls have 50% or more Speckle Park genetics with other selected breeds. (Progeny from these bulls cannot be registered with SPI)

Genetic Testing Key	
COAT	ED/ED - homozygous dominant black ED/e - dominant black/recessive red
POLL	PcPc - homozygous polled HPc - carries one copy of the horn gene
MYOSTATIN	F - free of the nt821 myostatin gene C - carrier of one copy of the nt821 myostatin gene

Sale Day Safety

Your safety on sale day is important to us.

Our cattle are quite and well-tempered however animal behaviour can be unpredictable at times. Animals can react differently when exposed to different situations for example large crowds of people and noise.

If you wish to enter inspection yards, please be mindful of the animals. Please do not enter sale pens with small children or if you have limited mobility.

Supplementary sheet

Any new or additional information will be available sale day along with a current weight sheet for this year's sale bulls.

Breeding Guarantees

Waratah Speckle Park have taken the utmost care to ensure all sale animals at time of sale are sound breeding animals.

All bulls are guaranteed breeders and have been semen morphology tested by John Cooper of Just Genes AB services QLD. Structural assessment is by our vet Dr Udo Mahne.

Semen test and breeding certificates will be provided to all buyers. It is than the buyer's responsibility to insure sale animals for infertility, injury or mishap.

Buyers need to be aware that breeding livestock comes with risk and due to the nature of livestock production being unpredictable, Waratah Speckle Park do not take any responsibility for live animals after the fall of the hammer and ask that in the unlikely event of infertility, injury or mishap that you contact your preferred insurer. No insurance equals no guarantee; so please remember to take out insurance at the fall of the hammer on sale day.

Insurance

We recommend buyers organise insurance with their agent or the insurance representative present on sale day.

Josh Lawlor from Nutrien Ag Solutions Guyra will be attending the sale and can help with any insurance needs, he can be contacted on 0429 668 002.

Advice Disclaimer

At Waratah Speckle Park we are willing to provide assistance to those seeking guidance and our opinion on cattle. However, the final decision is that of the purchaser.

Waratah Speckle Park will not be responsible for the final results and performance.

Sale Catalogue Disclaimer

The vendors have taken care to provide information that is correct to the best of their knowledge at the time of publication. However, neither the vendors nor the selling agent make no other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue.

It is advised that you seek independent verification of any information contained in this catalogue before relying on such information. Announcements made on sale day supersede information in this catalogue.

Caring for Waratah Speckle Park Bulls: Protect your Investment

The Waratah Way

The purchase of a Waratah bull is a long-term investment, so they should be treated with care and in a gentle manner. Always handle them quietly and at a walking pace. By doing so, you will earn their respect and maintain their good temperament. Our bulls are vaccinated and drenched prior to sale and can serve approximately forty cows as two year olds and slightly more as older bulls. They are handled with dogs and contained using electric fencing, so they will treat both with respect. A Waratah Bull provides excellent opportunities in genetics and can improve the value of your herd into the future.

Transportation & Handling

At the fall of the hammer at auction you take possession of your purchase, so from that moment, it is important to treat your new investment with care. You might like to consider insurance for transportation back to your property and for the first few months of ownership.

A bull leaving Waratah should be unloaded at your yards, with house cows, steers or herd cows as companions. Always separate bulls from different origins into different yards. Remember your bull is leaving the security of a mob and will arrive in unfamiliar territory at your property.

Vaccinations/Treatment

Always consult with your veterinarian and establish a health treatment plan to be given on arrival at your property. It is important to vaccinate against vibriosis, as it is a common cause of infertility and is transmitted by infected bulls. Fortunately, this disease is easily prevented by vaccination prior to joining each year. A drench is important when he is finished serving the cows. You may also treat bulls yearly with other injections that are appropriate for your local area/state.

Behaviour & Temperament

The temperament of any bull is best demonstrated by their behaviour in the yard before auctioning begins. During and after action and/or on arrival at your property their behaviour may change due to changes in environment and increased stress. Bulls may display a change in temperament, becoming excited and/or agitated. A number of stimuli may cause this change including unusual and loud noises, new people, crowds, a new environment, new feed, loss of mates, a new herd and different handling methods. This can be very upsetting to animals. It is best to allow bulls' time to adjust to their new environment. You can assist this by providing adequate feed, water, low noise levels and a mate i.e.

house cow. Once settled into their new environment bulls' temperament will return to normal.

Young Bulls (12-18 months)

It is possible for a young bull to settle in with older bulls, however the paddock needs to be large enough for the young one to keep away from the others and to find adequate feed. As the new bull, he will get the last of the feed available because of the pecking order. Young bulls are still growing and need enough feed to maintain their growth pattern, which may require supplement feed in the first breeding season. Having enough paddock area also helps them to be able to settle the cows quickly and efficiently. We recommend mating loads of only 25-30 females. Never overwork young bulls. As they are not fully developed, they will be leaner and carry less body fat reserves. If their condition score declines to below 3, sperm production may be compromised. Their condition is essential for good fertility. It is also important to note that the joining season may need restricting to 6-8 weeks if conditions are extensive and where good quality feed is unavailable.

Mating

Cows should be seen cycling in groups with male calves hanging around before mating. If using several young bulls, they should be run together for a few weeks prior to joining. This should reduce problems later on as they will have already established a hierarchy. Also, young bulls that have been recently purchased should not be joined together with older bulls.

Always observe your bull when he is working as accidents can happen. Bulls can scratch their penis on dry manure on the cows backside which can lead to infection with large sores forming. If treated quickly this can be remedied. If a bull is not serving, he needs to be replaced, but remember, if the cow has been served before the observer has arrived, the bull may not repeat the performance. Remember any day he is not working can cost you money.

Nutrition

When your new bull arrives at your property, provide adequate hay and water and leave him alone until the next day so he has a chance to settle. Before you join your bull with a herd, the cows should be on a rising plane of nutrition to ensure they have the greatest possible chance of cycling. When the season is finished, the bull should be put away with quality, adequate feed, as this will help prevent fighting.

Please remember: Always respect your bull and he will respect you.

What is Breedplan/EBVs

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs.

Gestation Length (days)

Gestation Length EBVs provide an estimate of genetic differences between animals in gestation length. Lower or more negative Gestation Length EBVs are considered to be more favourable as a bull with a Gestation Length EBV of -2 days would be expected to produce calves that are born earlier, and more easily, than a bull with a Gestation Length EBV of +2 days.

Birth Weight (kg)

Small or moderate Birth Weight EBVs are more favourable as a bull with a BW of +2 kg would be expected to produce lighter calves at birth than a bull with a BW of +6 kg, with a lower risk of a difficult birth. However, whilst low BW EBVs are favoured for calving ease they are also generally associated with lower overall growth potential. Therefore, birth weight and growth EBVs need to be carefully balanced. Animals can have both moderate birth weight EBVs and above average EBVs for later growth.

Growth EBV's (kg)

Three growth EBVs are currently calculated by Breedplan; 200 Day Growth, 400 Day Weight and 600 Day weight. These EBVs are the best prediction of the animal's ability to grow to weaning (200 day), yearling (400 day) and later ages (600 day). 200 Day Growth EBVs are important to vealer breeders, 400 Day Weight EBVs for yearling breeders and 600 Day Weight EBVs for breeders of heavy steers.

Mature Cow Weight (kg)

Mature Cow Weight EBVs are estimates of the genetic difference between cows in live weight at 5 years of age. Animals with a higher, more positive Mature Cow Weight EBVs would be expected to produce progeny with a higher mature weight than animals with lower Mature Cow Weight EBVs. What level of Mature Cow Weight EBV is optimal will depend on the individual herd and its breeding objective. Breeders looking to decrease the mature weight of their cows may look for lower Mature Cow Weight EBVs whereas breeders looking to increase their returns from the sale of cull cows may look for higher Mature Cow Weight EBVs.

Milk (kg)

Milk EBVs provide an estimate of the maternal contribution of a dam to the 200 day weight of her calf. In the case of sires, this estimates the maternal contribution that his daughters will

make to the 200 day weight of their progeny. Larger, more positive, 200 Day Milk EBVs are generally more favourable, depending on the environment. For example, a bull with a 200 Day Milk EBV of +15 kg would be expected to sire daughters with higher milk production than a bull with 200 Day Milk EBV of +5 kg. This higher milk production potential should be reflected through higher weaning weights among the daughter's calves.

Scrotal Size (cm)

Scrotal Size EBVs provide an estimate of the genetic difference between animals in scrotal circumference at 400 days of age. Larger, more positive, Scrotal Size EBVs are generally more favourable. For example, a bull with a Scrotal Size EBV of +4 cm would be expected to produce sons with larger testicles at yearling age and daughters that reach puberty earlier than the progeny of a bull with a Scrotal Size EBV of -4 cm. Scrotal Size is the most important EBV to look at when determining the fertility of individual animals.

Carcase Weight (kg)

Larger, more positive, Carcase Weight EBVs are generally more favourable. For example an animal with a Carcase Weight EBV of +40 kg would be expected to produce progeny with heavier slaughtered carcasses at 650 days of age than an animal with a Carcase Weight EBV of +30 kg.

Eye Muscle Area (sq cm)

Larger, more positive, EMA EBVs are generally more favourable as a bull with an EMA EBV of +4 cm² would be expected to produce steer progeny with a greater degree of muscle expression than a bull with an EMA EBV of +1 cm², relative to carcase weight.

Rib Fat / Rump P8 Fat (mm)

More positive or more negative Rib/P8 Fat EBVs may be more favourable, depending on your breeding goals relating to the finishing ability of your animals. A bull with a Rib/P8 Fat EBV of -0.4 mm would be expected to produce leaner calves than a bull with a Rib/P8 Fat EBV of +0.4 mm, relative to carcase weight.

Retail Beef Yield (RBY)

Larger, more positive, RBY EBVs are generally more favourable. Animals with a higher EBVs are expected to produce progeny that yield higher percentages than animals with lower EBVs.

Intramuscular Fat (%)

Larger, more positive IMF EBVs are generally more favourable. An IMF of +0.8% would be expected to produce progeny that would express more marbling than an animal with an IMF of +0.1%.

AUGUST 2021 SPECKLE PARK BREEDPLAN REFERENCE TABLES

15% In the catalogue we have highlighted EBVs that are ranked in the top 15% of the breed or better.

Notes: Zazu has not disappointed, his calves are long and grow out well. Zazu is a very structurally correct bull who first attracted our attention in the Canadian Source Speckle Park Sale in 2013. Laiton while in Canada in 2016 was able to view Zazu as a mature bull and he did not disappoint. Zazu is a free moving thick soft bull. We are very impressed with the extra length he has put into his offspring.
